

Do you know that fruits are packed with superpowers to help us build strong immunity? Let us get into the colorful world of fruits! For example, “Do you know that each strawberry contains over 200+ seeds?” or “Do you know that mango is 4000+ years old?” What are your favorite fruits for each season?

In the first lesson, we will explore a group of fruits together and compare their physical differences in colors, textures, and tastes. Then we will pick a fruit each subsequent lesson to study in-depth about its different features, such as the origin of a fruit, the different varieties in US and around the world, what are some of the common products made with the fruit, scientific facts, nutritional values, and interesting fun facts!

Vocabulary
